

WHY COMPOST?

Most of today's popular vegetables evolved growing in dark, deep soil, rich in organic matter (rotting leaves, wood, etc...natural compost). In Adelaide the soil is often far from this natural condition. Well made compost is the quickest way to improve soil, bringing it closer to the natural condition than any other additive could.

GENERAL PURPOSE

Originally designed for growing organic food crops, our compost gives excellent results on lawns, annual flower beds, roses, trees and ornamental landscapes.

Professional Landscapers are in fact our largest customers and they rely on the consistent quality and results achieved with our compost.

HOW TO USE COMPOST

Dig it into your soil or mulch it around plants. Top dress lawns and garden beds. Use for planting seedlings, all types of trees, roses and shrubs. For best results keep moist, remember, compost is alive. Compost can be covered with a coarse mulch such as straw or landscapers mulch. Regularly add organic fertiliser to promote steady growth.

MULCH WITH COMPOST

Coarse compost makes an excellent dark mulch by itself, however dry mulches such as straw used on top of composted garden beds reduce weeding and evaporation. This combination saves water and maintains worm activity near the surface.

COMPOST/MULCH COVERAGE

One cubic metre covers ten square metres at a depth of ten centimetres.

OPEN 6 DAYS
7.30am – 5.30pm Monday to Friday
8am – 4pm Saturday

CLOSED
Sundays
Public Holidays

Building Rich Living Soil Since 1990

Used for planting, compost ensures a healthy start for any shrub, tree or vegetable.

Topping up pot plants with compost conserves moisture and gives them a new lease of life.

Spread throughout the garden, compost encourages vigorous worm activity.

Work the compost into the soil to the root depth with a fork, or rotary hoe for larger areas.

Compost spread approx 4cm deep around fruit trees and covered by a dry mulch works wonders.

Compost is the magic ingredient for improving and speeding up your home vegetable scraps compost bin.

Product List

(All prices GST inclusive)

Organic Compost

Fine Sieved Compost*^	\$59.50m ³
Fine Sieved Compost bag*	\$8.00
Coarse Compost*	\$37.00m ³
Coarse Compost sack*	\$5.50

Mulches

Woodland Mulch	\$28.00/m ³
